

ADDENDUM TO THE 2024 CONSUMER CONFIDENCE REPORT

The City of Madison Water Department's previously distributed CCR did not meet all the federally mandated requirements, and this mailer contains the missing/incorrect information.

Lead Service Line Inventory Notification

In accordance with the U.S. Environmental Protection Agency's Lead and Copper Rule Revisions (LCRR) and the Indiana Department of Environmental Management (IDEM) requirements, Madison Water Department has completed a comprehensive inventory of all known and potential lead service lines within our water distribution system.

This Lead Service Line Inventory was completed in 2024 and provides information about the materials used in both the publicly and privately owned portions of water service lines connected to our system. This effort was undertaken to help identify and reduce potential sources of lead exposure in drinking water.

The completed inventory is available for public review online at the IDEM Lead Service Line Inventory Portal:

<https://idem.120water-ptd.com/>

Customers can visit the website to view the inventory data for Madison Water Department and to learn more about lead in drinking water, including ways to minimize potential exposure.

For questions or to request a printed copy of the inventory, please contact:
